

Retro and Square Base Bar Stool Instructions

Instructions for base ordered with out seat.

Step One

Inspect base with the following attached: swivel, foot rest and glides.

Do not use impact cordless drill to attach seat.

When using cordless drill with adjustable chuck, set drill speed to slow speed.

Set chuck torque to low torque. This will eliminate stripping screw in the seat.

Step Two

Place swivel on seat base. Align holes in swivel to holes in base. Use 4-1/4x3/4" machine screws to attach base to swivel.

Do not force screws into holes with "T" nuts you could dislodge the "T" nuts and would be unable to attach seat to swivel.

Start all screws first with your fingers then use a screw driver or cordless drill to tighten.

If your swivel base holes don't match our mounting holes use the 4 wood screws and lock washers to mount seat to your base.

You are now ready to use you new bucket.
